

ABSTRACT

Disclosed herein is an image forming process comprising the steps of applying a first material
5 for improving the wettability of the surface of an intermediate transfer medium to the intermediate transfer medium, applying a second material for lowering the flowability of an ink to the intermediate transfer medium to which the first
10 material has been applied, applying the ink to the intermediate transfer medium, to which the first material and second material have been applied, from an ink-jet recording head to form an image of the ink on the intermediate transfer medium, and
15 transferring the ink image formed to a recording medium.
